

The BA307SE loop powered, panel mounting Indicator has a rugged stainless steel housing allowing it to be safely installed in an Ex e, Ex t or Ex pzc panel located in Zones 2 or 22 without the need for Zener barriers or galvanic isolators. The indicator has a full 4 digit display with guaranteed performance between -40 and +70°C. The scale card can easily be marked to show the units of measurement and can be fitted on-site without dismantling the instrument or removing it from the panel.

The main application of the BA307SE is to display a measured variable in meaningful engineering units in Zones 2 or 22. The front of the indicator has certified impact and ingress protection allowing it to be installed in an Ex e, Ex t or Ex pzc certified panel without invalidating the panel's certification.

The bold 15mm high 4 digit display provides maximum contrast and has a wide viewing angle, allowing the BA307SE to be read easily in most lighting conditions over a wide temperature range. An optional factory fitted backlight is available for applications in poorly illuminated areas. The four digits, with three decimal point positions and a negative sign, can be configured to display any variable between -9999 and 9999 using the four front panel push buttons which may be protected by a user defined four digit password.

International Ex ec and Ex tc certification complying with the latest standards allows the BA307SE, when installed in a certified Ex e or Ex pzc enclosure, to be operated in a Zone 2 gas hazardous area without the need for Zener barriers or galvanic isolators. For Zone 2 applications worldwide the BA307SE offers a less expensive alternative to intrinsic safety and flameproof indicators. The BA307SE supersedes the BA307NE indicator following the replacement of Ex nA non sparking protection by Ex ec increased safety protection. **Ex tc dust certification** also allows the BA307SE, when installed in a certified instrument panel or enclosure, to be operated in a Zone 22 dust hazardous area, again without the need for Zener barriers or galvanic isolators.

A backlight which may be loop or separately powered is available as a factory fitted option. It provides green background illumination allowing the display to be read at night or in poorly illuminated areas. When powered from the 4/20mA loop no additional field wiring is required but the indicator's voltage drop increases. Powering from a separate supply produces a brighter backlight but requires additional field wiring.

Optional dual alarm outputs which can switch hazardous or safe area loads, such as sounders, beacons or solenoid valves are available as a factory fitted option. The two galvanically isolated solid state alarm outputs may be independently configured as high or low alarms with normally open or closed outputs. Annunciators on the display show the status of both outputs and the display digits can be configured to flash when an alarm condition occurs.

Units of measurement may be shown on the scale card which is visible through the window on the right hand side of the display. Instruments are supplied with the units legend requested when ordered, but the scale card may be easily changed on-site without removing the BA307SE from the panel or opening the instrument enclosure.

Application Guide AG321 which explains how Ex ec certified instruments should be installed may be downloaded from the BEKA associates website, or requested from the BEKA sales office.

Other models in this range include the BA327SE which has a similar specification with five 11mm high digits and a 31 segment bargraph.

BA307SE Rugged 2-wire 4/20mA 4 digit indicator

Ex ec and Ex tc certified for installation in Ex e, Ex t and Ex pzc panels in Zones 2 and 22

- Rugged IP66 stainless steel enclosure.
- International Ex ec & Ex tc certification eliminates the need for Zener barriers and galvanic isolators.
- Loop powered only 1.2V drop.
- 4 digit 15mm high display.
- Optional backlight & alarms.
- Easy on-site configuration & scale card installation.
- Supersedes the BA307NE.
- 3 year guarantee
