The BExBG05D is a bright flashing xenon beacon for use in hazardous areas. Housed in a robust IP67 enclosure it is suitable for exterior mounting and is available with coloured lenses to aid alarm identification.

**Main application** of the BExBG05D is to provide a visual warning in noisy areas where a sounder may not be heard, or to supplement a sounder warning. The beacon produces a regular bright flash once every second and will attract attention in most ambient lighting conditions.

**ATEX and IECEx flameproof certification** allows the beacon to be installed in Zones 1, 2, 21 & 22 and to be used with most industrial gases.

**Higher output** 10 and 15 joule beacons are also available.
