

## New press release from BEKA associates

January 2018  
PR 0118

### **BEKA give Saffron Gloveboxes a hand**

Saffron scientific equipment Ltd who are specialists in the design, development and manufacture of Gloveboxes, are using BEKA Advisor A90 universal process panel meters to display critical containment pressures. Each meter has a multicolour negative liquid crystal display, with the display colour linked to the meter's alarm status providing very conspicuous multiple alarm warnings. Although Advisor A90 meters are easy to configure and calibrate on-site, they are supplied pre-calibrated to Saffron's requirement including a printed slide-in scale card showing the units of measurement which significantly reduces commissioning time.

Based in Knaresborough North Yorkshire, Saffron's technical director Andrew Lees said that BEKA Advisor A90 meters were chosen because they are easy to install and have a wide range of features including multiple latching alarms, colour change displays, and the ability to re-transmit a 4-20mA signal. Saffron's bespoke gloveboxes and containment systems are widely installed in process and nuclear industries in addition to research laboratories for the storage, handling and processing of hazardous and toxic substances.

For further Advisor meter information please visit <http://www.beka.co.uk/advisor.html> or phone the BEKA sales office on 01462 438301.

Saffron can be contacted at: [sales@saffron-uk.com](mailto:sales@saffron-uk.com) or on 01423 798218
