

New press release from BEKA associates

May 2020
PR 0120

BEKA bears all !

The [Teddy Bear Line](#) a G scale garden railway in Bedfordshire is continuing to run a normal service during the COVID-19 pandemic. As part of ongoing engineering works, a dynamometer car has recently been commissioned which employs a BEKA BA338E rate totaliser to measure and display train speed and the distance travelled. Originally designed and certified for installation in a flammable atmosphere, the panel mounting BA338E consumes very little power and is therefore ideal for this application.

A spokesperson for the line's Controller said, '*Working from home means that the teddies get out on the line earlier in the day and are greatly enjoying working in the Spring sunshine*'.

For further information please visit <https://www.beka.co.uk/ba338e> or phone the BEKA sales office on +44 (0) 1462 438301.
