

New press release from BEKA associates

January 2018
PR 0218

BEKA indicators installed in polyurethane manufacturing plant

Positive Weighing Solutions Ltd have recently installed BEKA BA304G field mounting loop powered indicators in a Midlands polyurethane manufacturing plant. The indicators, which have ATEX and IECEx intrinsic safety certification, display process temperatures and are working alongside Dini Argeo weighing monitors supplied by Positive Weighing Solutions.

Positive Weighing Solutions are a ten year old company specialising in industrial weighing and automation. Located in Malvern, they design, install and maintain industrial equipment throughout the UK and are a premium distributor of Dini Argeo weighing systems. Their specialist knowledge of protection techniques for flammable environments has resulted in much of their recent work being for hazardous area applications.
