BEKA associates Add INMETRO Certification

BEKA associates are pleased to announce the attainment of InMetro certification for Brazil. In-conjunction with local partner, Sense Electronica Ltda of Sao Paulo, the two companies have worked together to achieve yet another international approval for the BEKA range of hazardous area indicators and displays. Complimenting the existing IECEx, ATEX, FM and cFM certifications for the popular intrinsically safe loop powered indicators, fieldbus indicators and displays.

To gain INMETRO certification the acceptance of an IECEx certificate by the Brazilian notified bodies has, in part, simplified the process that prior to the 2011 agreement between IECEx and Brazil was a more complicated process. Hertfordshire based BEKA associates design and manufacture a full range of process monitoring products for hazardous area including flow rate totalisers, batch controllers, serial text/data displays, set point generators plus sounders and beacons.

For further information including datasheets, certificates and instruction manuals please visit www.beka.co.uk or phone the BEKA sales office on 01462 438301
